

OUR PRODUCTS

LADDER CABLE TIE

Our Ladder Cable Tie's unique multiple-locking system is strong enough to hold up to 220 lbs. Designed for fast and easy application, it is resistant to vibration and comes uncoated or coated in polyester or nylon 11. These cable ties are manufactured in 201 stainless steel, 304 stainless steel, 316 stainless steel, or galvanized carbon steel. Available in two widths - 0.27" (7mm) and 0.47" (12mm).

CLIP-STYLE BUCKLE

The stainless steel banding buckle is for light-duty applications. Normally used for insulation and cable/hose bundling. Available in 201 Stainless Steel, 304 Stainless Steel, 316 Stainless Steel, or Galvanized Carbon Steel. It comes uncoated or coated in polyester or nylon 11.

SELF-LOCKING CABLE TIE

Manufactured in stainless steel 304 or 316 for a longer life span and mechanical resistance. It has the highest tensile strength in the market. Also available with 0.47" (12mm) width (with double head buckles). Fechometal's self-locking cable ties come uncoated or coated in polyester, nylon 11, or heat shrinkable.

STEEL BANDS

Our stainless steel straps offer very high strength and good resistance to weathering and oxidation. With Fechometal USA's easy range, each foot long will be marked with a FM circle logo to help reduce material scrap.

*Durable plastic dispensers or cardboard box.

FAST BAND

Our ready-to-use CV Boot Band Clamps are designed for fast application with reduced scrap material. Available in Stainless Steel 430, 201, 304, 316, or galvanized carbon steel, it comes uncoated or coated in polyester, epoxy, or nylon 11. Bands come in standard or custom sizes and in a variety of colors upon request.

TENSIONING HOOK

Manufactured in carbon galvanized steel. Used with ladder and reusable cable ties.

Fechometal USA's products are designed for quick and easy application, with very high strength and good resistance due to different coatings and types of stainless steel (available upon request). Our industry experts are always available to help you solve your problems with Fechometal USA solutions, answering questions about products, prices and techniques.

APPLICATION TOOLS

MINI TOOL

Tensioner with built-in cutter for band and self-locking cable ties. For use on band widths of 3/16" to 3/8". Used as a CV Boot Tool.

CABLE TIE FIXING PISTOL

Fasten and cuts off self-locking cable ties automatically. Adjustable bundling pressure function. Used to install uncoated cable ties up to 3/8" (9.53mm) wide and up to 0.01" (0.3mm) thick.

TENSIONING TOOL

Tensions and cuts off self-locking cable ties. For use on cable ties up to 0.39" (10mm) wide and up to 0.4" (0.4mm). Can be used with uncoated or coated cable ties.

FECHOMETAL USA

Fechometal USA is an American manufacturer of high-quality stainless steel products. With years of experience in the industry, Fechometal became an international manufacturer with locations in the United States and Brazil, serving a variety of markets across the globe.

At Fechometal USA, we focus on maintaining our clients' satisfaction and credibility, always innovating while also continuing the tradition that has positioned our company as the reference for quality in the industry.
