

OUR PRODUCTS

MOUNTING PLATE

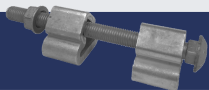

Our mounting plate's band slot accommodates single or double wrap bands, and can be reused or permanent. Our product can be used along with bolt clamps and banding to attach extremely heavy equipment items to poles. Extruded aluminum fittings with galvanized plated bolt and nut are both included. Available for 3/4" and 1.1/4" bands.

MOUNTING KIT

Ready to use, pre-cut band and pre-assembled with a bolt-clamp. No need of a special tool, can be installed with just a wrench or ratchet. Can be adjusted, reused or permanent.
*Available in 3/4" and 1.1/4" for heavy duty.

BOLT CLAMP

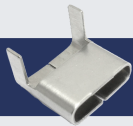

Our aluminum Bolt Clamp allows the installation of equipment on round or square poles, and can be used with mounting plates when working with heavy equipment and service items. This easy-to-apply product can be adjusted, reused or permanent. Available for 3/4" and 1.1/4" bands.

STEEL BANDS

Our stainless steel straps offer very high strength and good resistance to weathering and oxidation. With Fechometal USA's easy range, each foot long will be marked with a FM circle logo to help reduce material scrap.
*Durable plastic dispensers or cardboard box.

CLIP-STYLE BUCKLE

The stainless steel banding buckle is for light-duty applications. Normally used for insulation and cable/hose bundling. Available in 201 Stainless Steel, 304 Stainless Steel, 316 Stainless Steel, or Galvanized Carbon Steel. It comes uncoated or coated in polyester or nylon 11.

SUPPORT STRAP

Manufactured in 201 and 304 stainless steel, our support straps are recyclable and offer long durability. Used to strap CATV and telephone cable to steel strand in aerial construction, they can also be used with the plastic support. Strap edges are processed to be smooth.

EAR-LOKT BUCKLE

The stainless steel banding buckle is normally used for hose assemblies, cable bundling and general fastening. The buckle can be uncoated or coated in polyester or nylon 11. Available in 201 Stainless Steel, 304 Stainless Steel, 316 Stainless Steel or Galvanized Carbon Steel.

Fechometal USA's products are designed for quick and easy application, with very high strength and good resistance due to different coatings and types of stainless steel (available upon request). Our industry experts are always available to help you solve your problems with Fechometal USA solutions, answering questions about products, prices and techniques.

APPLICATION TOOLS

APPLICATION TOOL (EASY)

Stainless steel strapping tool manufactured in forged steel, it is used to install bands of 1/4" to 3/4". Useful in tight areas with minimal access.

TENSIONING TOOL (STANDARD)

Strapping tensioning tool made of forged steel with electrostatic painting. For use on band widths of 1/4" to 3/4" and thickness up to 0.03" (0.76mm).

RATCHET TOOL

Banding tool made of forged steel and nickel painted, it is appropriate for 1/4" to 3/4" bands and thickness up to 0.03" (0.76mm).

FECHOMETAL USA

Fechometal USA is an American manufacturer of high-quality stainless steel products. With years of experience in the industry, Fechometal became an international manufacturer with locations in the United States and Brazil, serving a variety of markets across the globe.

At Fechometal USA, we focus on maintaining our clients' satisfaction and credibility, always innovating while also continuing the tradition that has positioned our company as the reference for quality in the industry.
